EDUCATION

B.Tech in Computer Science & Engineering(AI & ML) Sep 2023- Jun 2027
State Institute of Engineering & Technology
CGPA: 8.23

TECHNICAL SKILLS

- Artificial Intelligence, Deep Learning, Machine Learning, Image Processing, Natural Language Processing
- Generative Adversarial Networks, Pattern Recognition, API Integration, Data Augmentation
- Python, TensorFlow, PyTorch, Flask, Jupyter Notebook
- Numpy, Pandas, Matplotlib, Scikit Learn, Scipy

SUMMARY

Aspiring AI/ML Intern with practical experience in deep learning, machine learning, and image processing. Completed an internship developing AI-driven applications using Python and modern frameworks.

- Built and deployed machine learning models for real-world applications using Python.
- Worked on image processing tasks and improved model performance through data preprocessing and optimization techniques.
- Integrated AI models into real-time systems, enhancing efficiency and responsiveness.

WORK EXPERIENCE

Samsung Oct 2025 – Mar 2026
AI/ML Intern Remote

- Built an image colorization system using GANs (TensorFlow) that converted 5,000+ grayscale images into realistic colored outputs with improved visual consistency
- Improved model accuracy by 18% through systematic hyperparameter tuning, data augmentation, and image preprocessing pipelines
- Designed efficient training pipelines reducing output distortion and improving generation quality across diverse image categories
- Gained deep hands-on experience with deep learning architectures including U-Net and conditional GANs in real-world AI/ML workflows

Pisoft Informatics Private Limited Jul 2025 – Aug 2025
AI/ML Intern Mohali, India

- Developed an AI-powered personalized learning system with course recommendations and an intelligent chatbot.
- Integrated machine learning models using Python to adapt content based on user performance and preferences.
- Built an interactive interface for real-time user interaction and improved learning efficiency.
- Optimized backend and model performance for faster, accurate responses.
- Gained practical experience in AI/ML, web development, and deployment of intelligent systems.

Internshala Jul 2024 – Aug 2024
Python Development Intern Remote

- Designed a GUI-based Billing Management System using Python and Tkinter to automate invoice generation and customer billing.
- Implemented features like product selection, real-time price calculation, tax computation, and dynamic bill generation.
- Designed an interactive interface with categorized items and automated total calculation, improving efficiency and reducing manual errors.

PROJECTS

Image Colorizer Using GAN network Jan 2026 – Feb 2026
Deep Learning | TensorFlow | GANs | Computer Vision

Built a GAN-based image colorization system achieving realistic outputs on 10,000+ images i.e. to transform grayscale images into realistic colored outputs.

Smart-AI Personalized Tutor Jul 2025 – Aug 2025
Machine Learning | Python | Flask | NLP | Chatbot | Recommendation System | Speech Recognition | Text-to-Speech | API Integration

Development of a multimodal AI-powered learning platform capable of processing text and voice inputs, providing personalized course recommendations, and delivering intelligent chatbot-based assistance for enhanced learning experience.

Billing Management System Jul 2024 – Aug 2024
Python | Tkinter | GUI Development | Event Handling | Basic Data Management

Designed a GUI-based Billing Management System using Python and Tkinter for automated product selection, real-time bill calculation, tax computation, and dynamic invoice generation.

ACHIEVEMENTS / EXTRA CURRICULAR / VOLUNTEERING

- Samsung Innovation Campus – Certificate of Completion (2026)
- Pisoft Informatics – Artificial Intelligence Internship Certificate (2025)
- Internshala – Python Training Certificate (2024)
